

Kamran Khan

AI & Data Enthusiast · Full-Stack Developer · Cybersecurity Researcher

Sukkur, Pakistan | kamrannizamani35@gmail.com | +92 325 8313573 | kamrandev.me | github.com/kamran-nizamani | linkedin.com/in/kamran-nizamani

SUMMARY

Results-driven Computer Science student at Sukkur IBA University specializing in AI, data analysis, and full-stack web development. Experienced in engineering scalable web applications and extracting actionable insights from complex datasets. Currently authoring supervised research on NLP-based emotion simulation and AI-based deepfake detection. Open to software engineering internships, freelance projects, and remote collaboration.

EDUCATION

B.S. Computer Science — Sukkur IBA University **2023 – 2027 (Expected)**

Sukkur, Pakistan

Coursework: Data Structures, DBMS, Machine Learning, Web Engineering, Cybersecurity

RESEARCH

Mimicking Human Emotions Using AI (Supervised Research) **2024 – Present**

- Synthesized 20+ peer-reviewed papers on affective computing
- Developed an emotion classification pipeline with Python & TensorFlow
- Exploring BERT & GPT variants for contextual emotion detection

NLP, BERT, TensorFlow, GPT

AI-Based Deepfake Detection (Supervised Research) **2024 – Present**

- Training CNNs & Vision Transformers for forgery detection
- Reviewing GAN-based forgery generation literature
- Evaluating model robustness against adversarial attacks

CNN, Vision Transformer, Deepfake, GANs

PROJECTS

Prepioneer — Live Production Learning Platform **kamrandev.me / GitHub**

- Production-grade learning platform with automated CI/CD via Vercel and zero-downtime deploys
- Iterated UI/UX driven by real user session data
- Optimized for sub-1s Lighthouse performance scores

React, Vercel, CI/CD

Smart Exam Prep **GitHub**

- Exam preparation platform with an adaptive scheduling engine that ranks topics by weakness
- Progress dashboard with per-subject analytics and role-based access for students & instructors

React, MySQL, Node.js

AI Crop Disease Detection **GitHub**

- CNN trained on 10,000+ labeled leaf images across 12 disease classes
- Lightweight REST inference API for mobile/edge deployment
- Achieved 94%+ classification accuracy

TensorFlow, CNN, Python

PromptBank

GitHub

- Centralized AI prompt management system with tagging, search, and team collaboration
- REST API for programmatic prompt retrieval; real-time shared workspaces

React, Node.js, REST API

Next.js Boilerplate (Open Source)

GitHub

- Production-ready starter with ESLint, Prettier, and Husky hooks pre-configured
- Modular, scalable folder structure with a dark-mode-first Tailwind design system

Next.js, ESLint, Prettier

SKILLS

AI / Machine Learning: Python, TensorFlow/Keras, scikit-learn, NLP, CNNs, Vision Transformers

Frontend: JavaScript, React, Next.js, Tailwind CSS, HTML5/CSS3

Backend: Node.js, Express.js, REST APIs, JWT/OAuth 2.0

Databases: MySQL, MongoDB, PostgreSQL, Firebase

Languages: Python, JavaScript, Java, C++, C

Cloud / DevOps: Docker, AWS (EC2, S3, Lambda), GitHub Actions, Vercel

Cybersecurity: Ethical Hacking Foundations, Security Risk Management, Network Security

Tools: Git, Linux

CERTIFICATIONS

- AI for Data Analysis — Google Career Certificates (2024)
- Foundations of Data Science — Google Career Certificates (2024)
- Play It Safe: Manage Security Risks — Google Cybersecurity Certificate (2024)
- Foundations of Cybersecurity — Google Cybersecurity Certificate (2024)
